NEW CHEMICAL PLANT BUILT,
ENTERPRISES CONSOLIDATED

BUDAPEST CHEMICAL PLANT COMPLETED -- Budapest, Hírek a Magyar Nepi Demokraciabol, 19 Oct 50

Construction of a sulfuric acid, boric acid, and borax chemical plant in Budapest has been completed and production has begun. Much of the raw material is being shipped to the factory from the USSR. Production of sulfuric acid has been greatly increased by the construction of the new plant, and new products never before manufactured in Hungary will also be produced.

FILM PLANT UNDER CONSTRUCTION -- Budapest, Hírek a Magyar Nepi Demokraciabol, 19 Oct 50

A new modern film factory of the Forte Photochemical Works is under construction at Budapest, and will be completed this year. The increased photographic and X-ray film production made possible by the construction of the new plant will be sufficient for the needs of the entire country.

CHEMICAL ENTERPRISES CONSOLIDATED -- Budapest, Ipari Ertesito, 8 Oct 50

Decrees issued by the Economic Council on 2 March 1950 merged the A. Schultz Instrument Factory at Budapest with the Kobanya Technical Material [Synthetics?] Factory, and merged the Jozsef Klein optical factory with the Technical Works.

Decrees issued on 29 June and 4 August 1950 called for mergers of the following plants: the Fulop Leiner and Sons Chemical Factory of Budapest with the Hungaria Chemical Works; the Istvan Szalay plant and the Ferenc Horvath and Associate autogenous welding shop of Budapest with the Iron and Metal Scrap Enterprise at Budapest; the Peter (Pal) Laszlo Lapalit instrument factory at Budapest with the Kobanya Technical Material Factory; and the Certe Pharmaceutical Corporation Laboratory, the Cito Pharmaceutical Chemicals Factory the Hormon Pharmaceutical Chemicals [plant?], and Human Pharmaceutical Works, all at Budapest, with the Richter Pharmaceutical and Chemical Factory.

PET NITROGEN WORKS CHALLENGES CHEMICAL INDUSTRY -- Budapest, Szabad Nep,
27 Sep 50

Workers of the Pet Nitrogen Works challenged the chemical industry to a production competition and pledged to finish their production plan for the year by 27 November. They would thereby produce 88,200 quintals of ammonium nitrate above plan by the end of the year and provide artificial fertilizer for 94,000 cadastral yokes of soil. They also pledged to reduce production expenses an additional 5 percent, saving 360,000 forints, to reduce the amount of overtime worked by 12 percent, as compared with the first three quarters of the year, to increase efforts to bring the production level up to 100 percent by the end of the year, to further the Stakhanovite movement in the chemical industry, and to develop new production techniques, at least 15 of which can be used throughout the country.
